OVERVIEW

As an associate in the e-Discovery Analysis & Technology practice group, Alexa Stemmler advises and advocates for clients during all stages of the e-discovery process. She provides strategic discovery counseling on matters with large amounts of electronically stored information. Alexa's recent experience includes complex commercial litigation, arbitration and investigations involving products liability, intellectual property, data breach response, SEC and DOJ investigations, and the Foreign Corrupt Practices Act. Alexa combines legal knowledge with pioneering technology to develop cost-effective and defensible solutions for her clients.

Alexa also counsels clients on litigation readiness and information governance in order to reduce risk and lower the cost of data management. She creates comprehensive record retention policies and schedules, keeping current with regulations and industry best practices.

Alexa's active pro bono practice includes work on immigration matters and post-conviction relief.

PROFESSIONAL BACKGROUND

Prior to joining the firm, Alexa was counsel at another international law firm where her practice focused on e-discovery and information governance.
