## OVERVIEW

Brian Montag is a practice group coordinator for the firm's global Environment, Land, and Natural Resources practice group. He represents clients in regulatory, enforcement, and litigation matters in various industries and manufacturing sectors, including construction, quarry, asphalt, cement, telecommunications, glass, paper, and chemical operations. Brian has served as outside counsel to leading State and Federal trade and business associations. He also has extensive experience representing clients in administrative, State and Federal court proceedings, as well as before the US Department of Justice, US Environmental Protection Agency, US Department of Transportation, and State transportation and environmental agencies regionally and nationally. Brian has served in leadership roles and as lead counsel in landmark environmental regulatory and litigation matters, including settlements involving environmental justice, Superfund, air, water, and solid and hazardous waste matters, as well as products liability and toxic tort litigation.

Brian is named in *Chambers USA* and has been listed in *The Best Lawyers in America*<sup>®</sup> in the areas of Administrative/Regulatory and Environmental Law since 2005.

## PROFESSIONAL BACKGROUND

Brian has served as lead regulatory and litigation counsel for numerous mid-size and Fortune 500 clients throughout his career. He served as lead counsel in a complex federal environmental litigation in which the United States Court of Appeals, Third Circuit, ruled in favor of his client on precedent setting environmental justice issues. Brian also served as lead counsel for a group of 65 companies in a nationally recognized solid waste litigation in which he successfully negotiated a global resolution with the government. Brian has taken leadership roles in representing clients at several of the top ten Superfund sites listed on the National Priorities List. He has also provided advice and counseling to companies in matters involving new facility construction and modifications, where he has managed complex permitting and compliance issues in all phases of these projects. Brian has also advised companies in developing community advisory panels and outreach projects to gain local support for manufacturing operations and related environmental permitting; he has developed a national network of liaison groups and organizations to assist in communications, as well as environmental and economic development support for these projects.
